All products are FSC®-certified

The Kebony® technology gives a deep rich brown color. After exposure to sun and rain the wood develops a natural silver-gray patina. Original color can be maintained using UV protection oils.

Kebony is a natural wood product for outdoor applications and its appearance will therefore be influenced by local environmental conditions over time.

Color changes and checking, or small surface cracks, will occur due to natural weathering. The manufacturer cannot be held liable for any of such variations in color and surface appearance as this will not influence durability and overall performance of the product.
